

PROFESSIONAL SUMMARY

BSCS graduate (IIUI) with hands-on experience building AI-powered applications, including an AI job-matching platform using CV parsing and semantic matching. Seeking an AI/ML role to apply and further develop these skills in a professional, real-world environment.

SELECTED PROJECTS

JobAI Scout — AI Career Copilot (Final Year Project):

Built an **AI-driven career automation platform** combining CV parsing, semantic CV-job matching, personalized cover-letter generation, and automated application assistance. Developed a **RAG-powered** chat/voice career agent capable of contextual job analysis and guidance, with a companion Chrome/Edge extension for real-time application support. Tech: React, TypeScript, Python, Supabase/PostgreSQL, RAG, LLM APIs — deployed on Vercel.

Data Analysis Toolkit – Python:

Built a reusable Python **Data analysis toolkit** with a CLI and Jupyter Notebook workflow for automated CSV analysis. Implemented data cleaning, statistical summaries, and Matplotlib visualizations, generating analysis outputs with minimal manual effort. Added automated testing and packaged the toolkit as an installable Python module for reusable, maintainable data workflows. Tech: Python, Pandas, NumPy, Matplotlib, Jupyter Notebook, Pytest, Python Packaging.

Car Rental Management System:

Built a **full-stack web application** to automate vehicle rental operations for customers and administrators. Implemented a customer booking system with vehicle availability and rental workflows, along with an admin management dashboard for managing vehicles, bookings, and customer records. Tech: HTML, CSS, JavaScript, PHP, MySQL.

Student Management System – OOP:

Developed a student record management application using **Object-Oriented Programming** principles to organize and manage student data efficiently. Implemented classes, objects, inheritance, encapsulation, and polymorphism to create a structured and maintainable application architecture. Tech: C++.

TECHNICAL SKILLS

Languages: Python, C++, SQL, TypeScript

Libraries: Numpy, Pandas, Matplotlib, Seaborn, Scikit-Learn

Tools: VS Code, Cursor, PyCharm, Git/GitHub, Anaconda, Vercel,

EDUCATION

International Islamic University Islamabad

BS Computer Science

Islamabad, Pakistan

Sep 2022 – Aug 2026

ACTIVITIES & LANGUAGES

• **Activities:** E-Gaming, Technology Exploring, Coding

• **Languages:** Urdu (native) · English (Fluent)
